

Cartoon Shipyard

- Slap Chicken Games -

NOTE

- Prefabs are made completely out of unity objects and were merged together in the scene for optimal performance using the addon “Simple Mesh Combiner” (Not included) found on the asset store. If creating your own level using the same prefabs, using a mesh combiner is advised to avoid lag with large amounts of objects.
- The standard asset “Post Processing Stack”, which can be found on the asset store is included.
- For any questions, please contact Nathan Davis using this email (noeticnathan@gmail.com).
- Please leave feedback for any improvements/criticism you may have.
- Thank you for purchasing this asset and have a great time working with it!
